# CERTIFICATE OF GUARANTEE

Company:  
Product description:  
Reference:  
Warranty start date

N° of pieces:  
Serial numbers:  
Project number:

## LIMITED PRODUCT WARRANTY

This guarantee will be applicable in the cases in which the photovoltaic module had, at the time of delivery, defects hidden or revealed after the same and that they made it inappropriate to carry out the functions for which it was manufactured, with the limitations and exclusions contained in the following conditions.

From now on, the acquirer will be understood as the natural person or legal entity that acquires the EXIOM SOLUTION photovoltaic modules for their intended use, i.e. as a generator of photovoltaic electrical energy. EXIOM SOLUTION through their manufacturer guarantees the purchasers of the photovoltaic modules supplied under the following conditions.

EXIOM SOLUTION guarantees for 12 years the materials that make up the photovoltaic module as well as the possible defects of the photovoltaic module due to the manufacturing process. If during this warranty period the photovoltaic module will stop working correctly as a result of some defect caused by the materials or by the manufacturing process, EXIOM SOLUTION reserves the right to choose between repairing the faulty module, replace it with an equivalent module or refund the price of purchase of the defective photovoltaic module. In case EXIOM SOLUTION decides to repair the module, EXIOM SOLUTION will use new components in said repair, being the components replaced those used by EXIOM SOLUTION in its normal manufacturing process

\* HJT models offer a 25 year product warranty in our modules  
\* IBC models offer a 25 years product warranty in our modules

## 2. LIMITED PEAK POWER WARRANTY

EXIOM SOLUTION guarantees 90% of energy production during the first 12 years of the useful life of the modules and 80% for the next 18 years, i.e. a 30 year limited warranty total. If the modules are tested under STC conditions (Standard Test Conditions) AM 1.5, Irradiance 1000W/M2 temperature 25°.

In our HJT modules, the degradation during the first year is less than 1%, guaranteeing a linear power degradation of less than 12% during the first 30 years of the module's useful life.

In our IBC modules, you are guaranteed a linear degradation of less than 7% over the first 25 years of the module's useful life and less than 10% in the first 30 years.

In the event that EXIOM SOLUTION determines that the module is not producing the guaranteed percentage of the minimum power of output specified previously, EXIOM SOLUTION reserves the right to choose between repairing the faulty module, replacing it by an equivalent EXIOM SOLUTION module or provide additional components to achieve power output specified, at least up to the minimum guaranteed percentage.

In the event that EXIOM SOLUTION decides to repair the module, EXIOM SOLUTION will use new components in said repair, this components being those used by EXIOM SOLUTION in its normal manufacturing process.

## 3. EXCLUSIONS AND LIMITATIONS OF THE WARRANTY

The guarantees offered do not cover damage and / or defects of operation due to:

- a. Incorrect handling or maintenance of the modules photovoltaics not complying with the instructions that EXIOM SOLUTION provides with its modules.
- b. The repair, modification and / or transfer of the EXIOM modules SOLUTION by a technical service outside of compliance from EXIOM SOLUTION or to be added to the EXIOM modules SOLUTION equipment other than those properly used by EXIOM SOLUTION.
- c. The abuse, misuse or negligent use of the modules photovoltaic.
- d. Power supply defects by the photovoltaic module produced by, atmospheric discharges, fire, flood, accidental breakage, actions by third parties and / or any other event or accident beyond the reasonable control of EXIOM SOLUTION and that have not been produced under conditions normal assembly operation and modules whose serial numbers have been tampered with or are not unequivocally identifiable are outside the present warranty.
- f. In case the first acquirer sells or transfers the module to third parties, this warranty will continue in force only if the sale or transfer is brought to the attention of EXIOM SOLUTION in writing in advance of its realization.
- g. The installation of the module in saline environments must be carried out with isolators to avoid galvanic corrosion between the module and its supporting structure.
- h. The warranty does not cover the costs associated with the installation, uninstallation, reinstallation and / or transport of modules EXIOM SOLUTION photovoltaic and / or any component associated with these for the service performed to solve the problem encountered during the warranty period.
- i. This warranty does not apply to modules marked "Grade B "or" Grade C ".
- j. This warranty applies only to the original purchaser of the module.
